BEHAVIOURAL REHABILITATION

PRICE LIST & PROGRAMME COMPARISON

Behavioural rehabilitation is fundamentally different from traditional dog training. Rather than focusing solely on changing behaviour, it seeks to understand and address the underlying factors contributing to that behaviour.

Every programme begins with a comprehensive assessment of the patient, their medical history, behavioural presentation, household environment and daily life before recommendations are made.

Meaningful behavioural change rarely occurs during isolated appointments. It requires consistency, ongoing assessment, careful programme adjustments and support throughout the rehabilitation process.

All Behavioural Rehabilitation Programmes require a minimum six-month commitment.

PROGRAMME COMPARISON

INCLUDED	BEHAVIOURAL	ADVANCED	INTENSIVE

18-Month Term	\$1,345/mo <i>(save \$150/mo)</i>	\$23,000 <i>(Save \$1,210)</i>

BEST SUITED FOR

Patients requiring intensive rehabilitation due to the severity, complexity or urgency of the behavioural presentation, and households with an unlimited number of active behavioural patients.

IDEAL FOR

- Severe human-directed aggression
- High bite-risk cases
- Cases involving council or legal proceedings
- Behaviour placing the household at significant risk
- Multiple severe behavioural disorders
- Veterinary behavioural medication monitoring
- Cases requiring rapid clinical intervention

EVERYTHING IN ADVANCED BEHAVIOURAL REHABILITATION, PLUS

- Unlimited active patients
- Highest scheduling priority
- Same-day behavioural support where clinically appropriate
- Emergency behavioural consultations
- Monthly veterinary behavioural collaboration where appropriate
- Behavioural crisis planning
- Multi-professional case management
- Priority report turnaround
- Intensive rehabilitation oversight

OUR PHILOSOPHY

Our programmes are designed around active behavioural patients rather than simply the number of dogs within a household.

Where clinically appropriate, resident dogs may be incorporated into the rehabilitation process without additional charge. Programme recommendations are based upon behavioural complexity, household dynamics and clinical need rather than household size alone.

During your suitability consultation we will recommend the programme we believe offers the greatest opportunity for successful rehabilitation.
